

Alex Matiasевич

Technical Leader • R&D Engineer • Software Architect

I combine strategic product thinking, hands-on engineering depth, and clear communication across teams and stakeholders.

*More than **15 years** of experience across web development, UI/UX, product engineering, and technical leadership.*

Strong at aligning people, architecture, and execution to turn ambiguous ideas into shipped products.

Location

Buenos Aires, Argentina (GMT-3)

Open to collaboration across time zones.

Remote work

Remote-first. Open to distributed teams.

Languages

- English (fluent, technical)
- Spanish (intermediate)
- Russian (native)

Skills & Technical Experience:

- Team leadership
- Modern JavaScript, TypeScript

- Modern frontend: frameworks, architecture, modern browser APIs
- Widgets & micro-frontends
- Complex application architecture
- Node.js
- PostgreSQL, MongoDB, Redis
- RabbitMQ, Kafka
- Docker, Kubernetes
- Nginx, Apache
- Cloudflare, AWS, Google Cloud, etc.
- AI Engineering, MCP, WebMCP, etc.
- JAMStack, SSG, SSR, SPA
- Canvas API, SVG, WebGL
- Web Components: Custom Elements, Shadow DOM, etc.
- Isomorphic approaches: one codebase for client and server
- Modern CSS and design systems
- UX/UI Design
- Design-in-code
- 2D/3D graphics
- Graph data structures
- Dialog interfaces
- Open Source project maintenance
- Effective development: dependency management, resource consumption control, flexible architectures
- R&D skills
- DevRel activities
- Technical interviews, candidate assessment

Career Highlights

rnd-pro.com

Period	Role
2022 - present	CTO, Tech Lead

- Led a team of experienced R&D engineers
 - Designed the architecture for a complex decentralized messaging platform.
 - Introduced a graph-based approach for granular real-time data management and a flexible strategy for mesh-instance updates and version control.
- Created the open-source foundation for multiple internal products and client-facing solutions
- Developed AI-assisted engineering workflows and standards

Uploadcare

Period	Role
2020 - 2022	Tech Lead

- Led the technical direction of File Uploader, one of the company's key products
- Designed a flexible architecture and composable library for file-upload workflows
- Created a comprehensive UI framework for widgets and micro-frontends

ZNAPZ (now Naviam)

Period	Role
2018 - 2020	Senior Web Developer

Delivered several in-house products end-to-end, from design to production, built on IBM Maximo with Firebase-based performance middleware:

- Infrastructure monitoring tool
- Asset management application for educational institutions
- Asset ordering tool (shop) for Maximo users
- Information board application for railway locomotive assembly lines

Implemented a flexible GraphQL-like API for IBM Maximo EAM over JSON-RPC, with types and structured response schemas, using Maximo automation scripts. The API filled functional gaps between built-in Maximo APIs and allowed clients to retrieve only the requested data, avoiding overfetching.

QUESTIONSTAR

Period	Role
2015 - 2018	Lead frontend developer / UX engineer

Developed a complex online-survey editor from scratch

- Conditional logic survey flows
- Rich content editors

Developed all UI and UX

Created a flexible graph-based data architecture with support for granular updates

Dressformer

Period	Role
2015 - 2016	Tech lead

The goal was to enable online virtual fitting: showing garments on a mannequin configured to match a user's body measurements.

We had a physically based cloth simulation, but it was too resource-intensive to scale as a web service. I proposed an alternative approach: pre-rendering garment shapes and quickly interpolating between 3D mesh vertex positions to approximate the simulation

result. This made real-time online fitting practical while preserving visual quality close to the original simulation.

ABBYY LS

Period	Role
2014 - 2015	Senior UX engineer, frontend developer

- Participated in the development of a translation-service marketplace as a frontend developer
- Developed UI/UX design for the new platform
- Participated in UX research and qualitative user research

Megavisor

Period	Role
2011 - 2014	Co-founder & CEO

- Secured funding
- Built the team from scratch
- Led the team and product
- Built an Interactive Media Publishing Platform

ZIQ Design

Period	Role
2006 - 2011	Art director, Owner

- Led a small team of 3D and graphic designers
- Specialized in interactive design and web design
- Created web projects end-to-end

This is only part of my story. For brevity, I selected the most meaningful stages at this moment. Each of them includes achievements, difficult decisions, and context that I would be glad to discuss in more detail.

Open Source

- **Symbiote.js** -- general-purpose frontend library for complex meta-applications, widgets, micro-frontends, and framework-agnostic UI libraries.

- **JSDA Kit** -- a comprehensive toolkit for building modern web applications with Static Site Generation (SSG), Server-Side Rendering (SSR), and dynamic servers.

- **CIT: Cloud Images Toolkit** -- a toolkit for managing image collections directly in your codebase, with CDN integration, collaboration, image optimization, and other advanced features.

Public Profiles

- **LinkedIn**

- **GitHub**

- **X.com**

- **Public CV**

Education

- **NTSU** (Novosibirsk State Technical University, Russia) -- Industrial Design

Hobbies

- Motorcycle touring

- Kayaking

- Outdoor programming
