

Alex Matiasevich

Technical Leader • R&D Engineer • Software Architect

Deep engineering expertise combined with strategic thinking.

*More than **15 years** of experience in web development, UI/UX design and technical management.*

Strong technical, communication and leadership skills.

Location

Buenos Aires, Argentina (GMT-3)

Available for other time zones.

Remote work

Yes, please.

Languages

- English (fluent, technical)
- Spanish (intermediate)
- Russian (native)

Skills & Technical Experience:

- Team leadership
- Modern JavaScript, TypeScript
- Modern frontend: frameworks, architecture, modern browser APIs

- Widgets & micro-frontends
- Complex application architecture
- Node.js
- PostgreSQL, MongoDB, Redis
- RabbitMQ, Kafka
- Docker, Kubernetes
- Nginx, Apache
- Cloudflare, AWS, Google Cloud, etc.
- AI Engineering, MCP, WebMCP, etc.
- JAMStack, SSG, SSR, SPA
- Canvas API, SVG, WebGL
- Web Components: Custom Elements, Shadow DOM, etc.
- Isomorphic approaches: one codebase for client and server
- Modern CSS and design systems
- UX/UI Design
- Design-in-code
- 2D/3D graphics
- Graph data structures
- Dialog interfaces
- Open Source project maintenance
- Effective development: dependency management, resource consumption control, flexible architectures
- R&D skills
- DevRel activities
- Technical interviews, candidate assessment

Career Highlights

rnd-pro.com

Period	Role
2022 - present time	CTO, Tech Lead

- Led a team of experienced R&D engineers
- Developed an architecture of complex decentralized messaging platform for clients. Implemented graph approach to on-the-fly granular data management. Implemented flexible mesh-instance update and version control strategy.
- Created an Open Source conceptual basement for a bunch of solutions and internal projects
- Developed AI-based development workflow and standards

Uploadcare

Period	Role
2020 - 2022	Tech Lead

- Technical leadership of direction of one of the company key-products - File Uploader
- Created a flexible architecture and solution constructor (library) for file uploading
- Created comprehensive UI-framework for widgets and micro-frontends

ZNAPZ (now Naviam)

Period	Role
2018 - 2020	Senior Web Developer

Was responsible for end-to-end development (from the design to final app) of several in-house products based on IBM Maximo as the backend, and performance middleware (Firebase):

- Infrastructure monitoring tool
- Asset management application for educational institutions
- Asset ordering tool (shop) for Maximo users
- Information board for railway locomotive assembly lines

Implemented universal flexible GraphQL-like API for IBM Maximo EAM over the JSON RPC, with types and structured response schemas, using Maximo automation script. It fills the functional gap between built-in Maximo API versions and allows to retrieve requested data only (nothing excess)

QUESTIONSTAR

Period	Role
2015 - 2018	Lead frontend developer / UX engineer

Developed complex online-survey editor from scratch

- Conditional logic survey flows
- Rich content editor

Developed all UI and UX

Created flexible graph-based data architecture with granular updates ability

Dressformer

Period	Role
2015 - 2016	Tech lead

The goal was to make possible online virtual fitting that shows clothes on mannequin configured to fit user's body sizes.

We had a physical simulation of cloth, but it was heavy in terms of resource consumption and was not scalable at all to be able be served as a web service. I came up with idea to

create pre-rendered cloth shapes and to make quick interpolation between 3d mesh vertex positions to make final result close to real simulations. So we solved the impossible task and made quick online fitting possible.

ABBY LS

Period	Role
2014 - 2015	Senior UX engineer, frontend developer

- Participated in development of translation service marketplace as a frontend developer
- Developed UI/UX design for the new platform
- Participated in UX-research, qualitative user research

Megavisor

Period	Role
2011 - 2014	Co-founder & CEO

- Got funding
- Built the team from scratch
- Led the team and product
- Built an Interactive Media Publishing Platform

ZIQ Design

Period	Role
2006 - 2011	Art director, Owner

- Led a small team of 3D and graphical designers
- Specialized on interactive design and web design
- Created web-projects end-to-end

This is only part of my story. For brevity, I selected the most meaningful stages at this moment. Each of them has its achievements, difficult decisions and context, which I am ready to discuss in more detail.

Open Source

- **Symbiote.js** -- common purpose frontend library aimed to the complex meta-applications, widgets, micro-frontends and agnostic UI-libraries.

- **JSDA Kit** -- a comprehensive toolkit for building modern web applications with Static Site Generation (SSG), Server-Side Rendering (SSR), and dynamic servers.

- **CIT: Cloud Images Toolkit** -- a powerful toolkit for managing image collections directly in your codebase, with CDN integration, collaboration, image optimization and other advanced features.

Public Profiles

- **LinkedIn**

- **GitHub**

- **X.com**

- **Public CV**

Education

- **NTSU** (Novosibirsk State Technical University, Russia) -- Industrial Design

Hobbies

- Motorcycle touring

- Kayaking

- Outdoor programming
